| Cause of spill                 |                                     | Corrosion: QIT Tank Farm Operator on surveillance observed oily water around Tank 6701 roof drain outlet due to roof washdown by heavy rainfall. Further inspection of Tank roof showed oiling on a roof plate from suspected corrosion hole.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                         |
